Project Management
Change Management
Communication & Presentation
Problem-solving
Capacity Planning
Production Planning

Objective

As deployment lead my core accountability is to standardize and improve E2E standards and processes in order to reduce losses impacting Manufacturing and Supply Chain interlock (including establishing KPIs, target and related reporting). Previously, as a Resource Lead I was accountable to optimize planning site activities: lead manning and productivity analysis, assess impact on production of any activity: Moreover, I was accountable of declared capacity for MTP plan and LRP assumptions.

Experience

May 2023 – present

Global OPEN+ Supply Network Deployment Lead • Philip Morris International

August 2021 – April 2023

Resource Lead • Philip Morris International

April 2020 – July 2021

Manufacturing Engineer (Site Reapplication Owner) • Philip Morris International

June 2018 – March 2020

Process Lead • Philip Morris International

Hard skills

- Advanced office package (VBA included), average SQL level
- Scheduling and ERP systems basic knowledge
- Process Mapping tools advanced knowledge
- Operative research interfaces (AMPL, RStudio) intermediate knowledge
- Fluent English (including business), Italian mother tongue, basic French

Soft skills

I describe myself as multi-tasking, fast learner and data driven decision maker.
I prefer to work under pressure and as part of a team.

Leadership

I never had direct reports as part of my role, but I am used to collaborate and lead several stakeholders to reach the best possible result given the allocated resources.
